### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Roh et al (US Patent No. 6,397,606) in view of Suzuki (US Patent No. 6,344,836). Roh discloses a kimchi refrigerator comprising: a refrigerator microprocessor (40) connected with a key manipulation unit (41) for receiving an input command from a user, a display unit serves to display an image based on the input command and thereby allowing the user to select an application program for setting up refrigerating and freezing environment. Roh disclosed invention lacks an audio output to output audio instructions. Suzuki teaches instructions based on the movement of a finger or pen touching a touch panel that yields digital information such as sound and music outputs (see column 7, lines 40-60). It would have been obvious to one of ordinary skill in the art at the time the invention was made to modified the disclosed invention of Roh with an output instruction as taught by Suzuki for the purpose of providing audio instruction sound and guidance on operating an appliance device.

### ***Allowable Subject Matter***

Claims 1-10 are allowed over the prior art of record.

***Response to Arguments***

Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***
